CRITICAL THINKING ACROSS THE CURRICULUM

INFUSING THE TEACHING OF CRITICAL AND CREATIVE THINKING INTO INSTRUCTION turns content lessons into direct instruction in the skills and processes of critical and creative thinking. Sample lessons and activity sheets help teachers construct their own infused lessons.

DEVELOPING HIGHER ORDER THINKING IN THE CONTENT AREAS K–12 presents easy-to-use techniques for integrating higher order thinking into any curriculum area. Sample lessons are included for social studies, language arts, mathematics, science, foreign language, guidance, and media.

ORGANIZING THINKING – Graphic Organizers (grades 1–3 and 4–7) integrates higher order thinking skills across the curriculum. These easy-to-use books include lesson plans, background information, graphic organizers, and answers. Lessons cover writing, math, science, language arts, social studies, enrichment, and personal problem solving.

BUILDING THINKING SKILLS® (grades K–2, 2–4, 4–7 and 7–adult) provides easy, inexpensive, effective activities in verbal and figural similarities and differences, sequencing, classification, and analogies. Activities are based on class discussion for maximum transfer across the curriculum. Ten years of outstanding test results at all ages, abilities, and socioeconomic levels support the quality of this series.

CRITICAL THINKING (grades 7–12 and 10–adult) encourages discernment in reading and listening and clarity of thought in speaking and writing. Topics include basic concepts in critical thinking, use and misuse of words and statements, propaganda and advertising techniques, logical reasoning fallacies, quantified statements, probability of truth and falsity, characteristics of arguments, and applied logic.

MIND BENDERS® (grades K–2, 2–6, 6–10, and 10–adult) sharpens students' deductive thinking skills by encouraging them to comprehend and organize sets of clues—some direct, some indirect—to reach logical conclusions. Skills developed and utilized within the series improve students' reading comprehension, math, writing, science, and test-taking abilities at all grade and aptitude levels.

CRITICAL THINKING IN LANGUAGE ARTS

THINK-A-GRAMS (grades 6–12) are rebus-type puzzles that provide an entertaining and challenging tool for developing right-brain thinking in coordination with left-brain memory.

DR. DOORIDDLES (grades K–3, 4–8, and 7–adult) are associative-thinking riddles. These rhyming puzzles are a fun way for students to exercise critical and creative thinking skills. They make terrific warm-up, extra credit, or sponge activities, or they can be used as the mental challenge of the day. The skills used in solving these activities will build and strengthen the critical and creative thinking tools students need for hypothesizing and generating multiple solutions to problems.

CRITICAL THINKING ACTIVITIES TO IMPROVE WRITING SKILLS (grades 4–7 and 7–adult) offers fun, easy-to-use activities to supplement any writing program. Students are asked to analyze a problem, produce a solution, and communicate the solution to other students in writing. Lesson plans, questioning strategies, and answers are given.

EDITOR IN CHIEF (grades 4–6, 6–8, and 8–adult) adds fun to English lessons. Each book in this carefully spiraled series provides 33 illustrated text activities. Students must edit for content by detecting discrepancies between the text and the illustration in addition to editing for grammar, punctuation, and usage.

LANGUAGE SMARTS (grades 2–4 and 4–6) offers a potpourri of quick language activities that develop students' associative-reasoning and problem-solving skills. The activities cover vocabulary development, classifying, sequencing, following directions, and word recognition.

LANGUAGE ARTS SOFTWARE

MIND BENDERS® (grade 2–adult) activities sharpen students' deductive thinking skills by encouraging them to organize sets of clues—some direct, some indirect—to reach logical conclusions. The objective of these well-known games is to strengthen deductive reasoning skills for better academic performance across the curriculum.

THINKANALOGY PUZZLES (grade 3–adult) help players build vocabulary and critical thinking skills as they match and classify fifteen complete analogies from a screen of thirty analogy halves.

ESCAPE FROM THE PYRAMID OF RIDDLES (grades 4–8) places students in the Pyramid of Riddles, where they must use their best divergent thinking to solve riddles and anagrams in order to escape. Students must visualize their travels and create a map of their surroundings.

ESCAPE FROM THE LOGIC SPIDERS (grade 6–adult) drops students into the tunnels of the logic spiders, where students must solve the logic problems or become trapped in the logic spiders' webs.

RIDDLE MYSTERIES (grades 2–4) delights young students and enhances their associative, inductive, and divergent thinking capabilities. The object of one of the many games in RIDDLE MYSTERIES is to fill up "Riddle City" by solving riddles about animals and objects that belong there.
